In algebra, a cubic function is a function of the form $ax^3 + bx^2 + cx + d$ in which a is nonzero.. Setting $f(x) = 0$ produces a cubic equation of the form $ax^3 + bx^2 + cx + d = 0$. The solutions of this equation are called roots of the polynomial $f(x)$. If all of the coefficients a , b , c , and d of the cubic equation are real numbers, then it has at least one real root (this is true for all odd degree polynomials).

Spam protection tools and anti-spam services. ... A limitation of the previous approach is that it relies on a valid and complete program: given an appropriate tool, it can be executed and reveal your email address. We can resolve this by making the program computationally incomplete with regards to the information we are trying to hide. The program now does not contain your full email address ...
