Windows 3.1x is a series of 16-bit operating environments produced by Microsoft for use on personal computers. The series began with Windows 3.1, which was first sold during April 1992 as a successor to Windows 3.0.Subsequent versions were released between 1992 and 1994 until the series was superseded by Windows 95.During its lifespan, Windows 3.1 introduced several enhancements to the still ...

## Computer Information Systems < Oakland Community College

A number of standard schemes have evolved. These are called levels.Originally, there were five RAID levels, but many variations have evolved, notably several nested levels and many non-standard levels (mostly proprietary).RAID levels and their associated data formats are standardized by the Storage Networking Industry Association (SNIA) in the Common RAID Disk Drive Format (DDF) standard:
