Colossus is a Turing machine designed by Charles Babbage in 1837. It was intended to read and decipher telegrams sent by the British Admiralty in the 1820s. The machine was never built, but its design was a precursor to modern computers. It was a mechanical calculator that could perform arithmetic operations on numbers. It was a Turing machine, which means it could perform any computation that could be described by a Turing machine. It was a Turing machine, which means it could perform any computation that could be described by a Turing machine.
